Summary

Professional Full-Stack Developer with 7+ years of experience building high-end web, mobile, and systems applications. Expertise in Laravel, React.js, Nest.js for web development, and Flutter for mobile development and proven ability to deliver user-centric interfaces that are accessible, secure, and performant.

Adept at the usage of Laravel/PHP, React.js/Next.js, Nest.js, Flutter, and Rust, with a keen eye for scalable architecture and security best practices. Talented at solving complex technical challenges, leading development teams, and optimizing workflows to deliver high-quality software solutions and passionate about crafting intuitive, user-friendly digital experiences that drive engagement and efficiency.

Experience

Full Stack Engineer

Richfill Enterprises • Ibadan, OY

08/2022 - Present

- Designed and implemented cloud-based solutions, improving system reliability and reducing downtime by 30%.
- Led development teams in building scalable and responsive applications with compliant architectures.
- Developed robust, secure API architectures for seamless integration with front-end and mobile apps.
- Provided technical mentorship, enabling junior developers to improve their efficiency and output quality.
- Led backend optimizations that enhanced system responsiveness and scalability, cutting response times by 40%.
- Owned architecture and design decisions on a large-scale consumer website
- Worked in Agile environments

Fullstack Developer (Laravel + Flutter)

Martech Stores • Ibadan, OY

09/2022 - 05/2024

- Built and deployed APIs to support seamless data exchange across web and mobile platforms.
- Built and ensured security measures compliant software to ensure safeguarding of sensitive data and prevent cyber attacks.
- Spearheaded the redesign of the user interface, increasing customer engagement by 10%.
- Implemented Agile methodologies to streamline development processes.
- Ensured cross-browser compatibility and accessibility, leading to about 20% reduction in reported UI issues.
- Published mobile applications on Apple App Store and Google Play, enhancing company reach.
- Conducted code reviews to enhance product quality and maintain coding standards.

Full Stack Developer (Nest.js + React + Plotly.py)

Veegil Media • Ota, Ogun

08/2023 - 12/2023

- Developed scalable and optimized microservices using Nest.js and Docker, boosting performance efficiency by 35%.
- Integrated automated testing, greatly reducing post-deployment issues.
- Collaborated with front-end teams to ensure seamless API consumption and system cohesion.
- Built an internal responsive election monitoring map that consumes real-time data from APIs.
- Delivered well-documented, maintainable code in an Agile environment, improving team efficiency.

Full Stack Development Team Lead

Kolhab Technologies • Abuja, FCT

09/2021 - 10/2022

- Led a development team to build multiple web applications, including an LMS and multiple e-commerce applications, with an increased project delivery speed of about 35%.
- Introduced Agile methodologies, improving team collaboration and software quality.
- Established and enforced coding standards, considerably reducing system crash reports and technical debt by 30%.
- Boosted network, system, and data availability and integrity through preventive maintenance and upgrades.
- Mentored junior developers, fostering technical growth and knowledge sharing within the team.
- Discussed project progress with customers, collected feedback on different stages, and directly addressed concerns.

Frontend Developer

DesignIT Africa • Oyo, IBA
08/2020 - 12/2021

- Led front-end development, optimizing UI performance to lighthouse 100%, and reducing load times by 28.7%.
- Worked closely with product and design teams to align development with business goals.
- Conducted usability tests, driving iterative improvements that enhanced user experience.

Freelance Web Developer

Agbado • Lagos, LA
10/2018 - 01/2020

- Developed custom websites and applications tailored to client needs, increasing user retention by 50%.
- Designed and implemented scalable front-end architectures using React.js.
- Built API endpoints and back-end services to support dynamic applications.
- Provided end-to-end architecture documentation for client projects.

Skills

Laravel, Problem Resolution, Analysis Skills, Agile, Flutter, Documentation, Time management, Teamwork, Rust, React.js, Nest.js, Next.js, Leadership, Docker, Microservices, AWS, CI/CD

Education

B.Eng Mechatronics Engineering

Bells University of Technology • Ota, Ogun
11/2027

- 4.95 CGPA | Awarded Exceptional Student Scholarship
- Coursework: Computer Science, Robotics, Statistics
- Led the development team that built the college's journal and publication website.
- Built the university's election application to run yearly student association elections.
- Volunteered as a backend team lead for two tech awareness and training campus organizations in the university.
